

## CAT version 3.3.10.1119 Release Note

This new release is mainly for MP-02Z users only. Many users requested if the jpg2yuv.exe utility can be integrated into CAT to make it more convenient to use. This new version of CAT improved this part so that there is no longer a need to create YUV files for image zones separately.

CAT added a new “NP-40” setting. The default is unchecked for the MP-02A like the figure below.

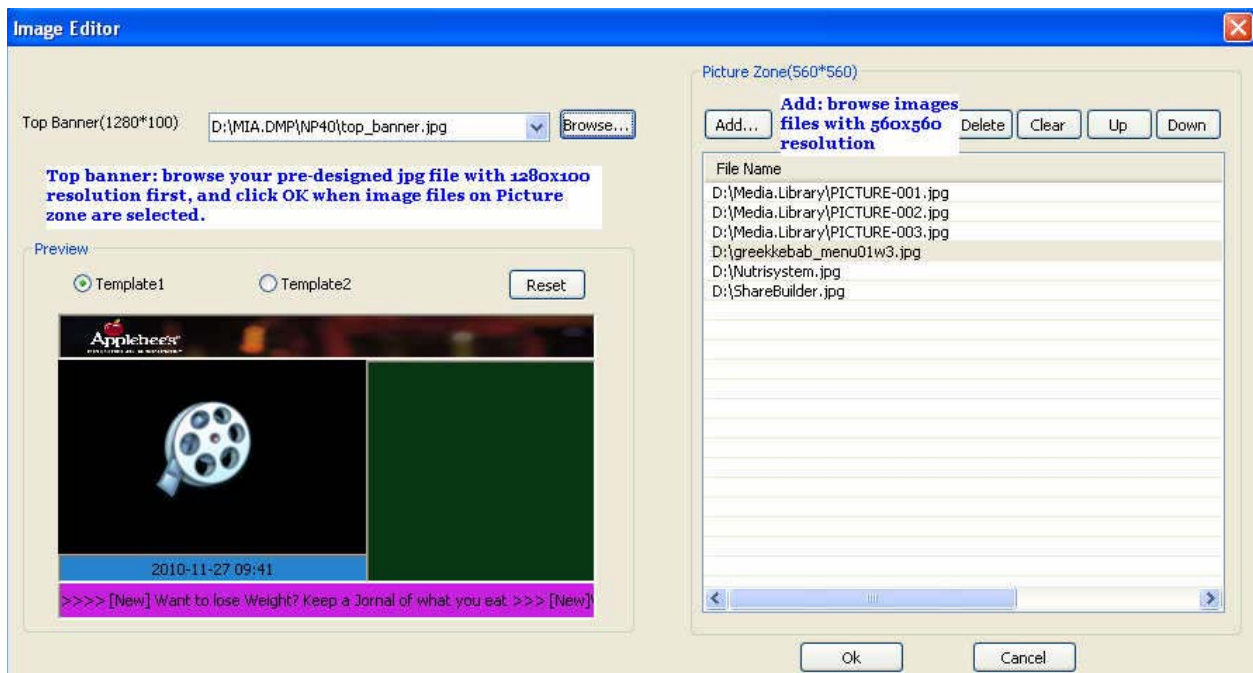

To enable the MP-02Z, check the “NP-40” box, “Add Image” and “FullScrn” will dim out.

FullScrn (Full Screen): The MP-02Z normally is a multiple zone layout. In case the user needs to show in full screen for a video or jpeg file. The user can move the mouse to any filename and click “FullScrn” and the icon before the file name will become a green color indicating that the file is in full screen mode. If there is a red dot, then the file is in a zone mode.

Open	Save	Settings	<input checked="" type="checkbox"/> NP40	Add Image...	FullScrn
Select Group/Device		Home		EZ-Play	
Seq.	File Name	File Path			
 1	PICTURE-001.jpg	D:\Media.Library\			
 2	PICTURE-002.jpg	D:\Media.Library\			
 3	PICTURE-003.jpg	D:\Media.Library\			
 4	PICTURE-004.jpg	D:\Media.Library\			

For example, Picture-001.jpg and Picture-002 will display as full screen image, then back to multiple zone layout for Picture-003.jpg

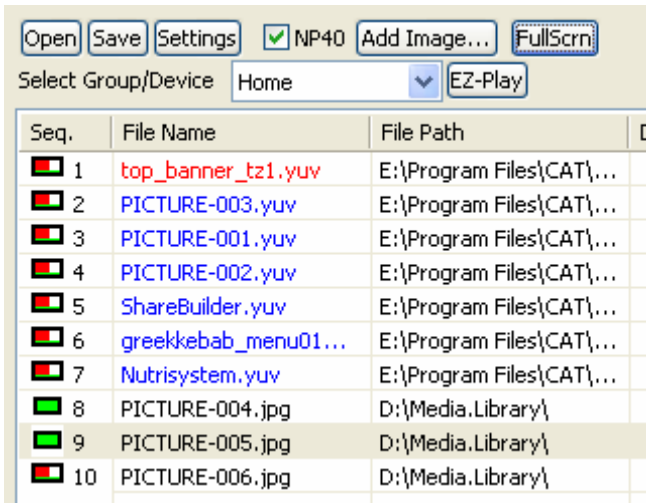

**Top banner:** Browse pre-designed jpg file with 1280x100 resolution as top banner image.

**Template1 and Template2:** for video zone and image zone layout. (can only be set once.)

**Add:** Add jpg files for image zone. Resolution is 560x560. If not 560x560, this tool also will scale to fit.

After top banner and image files are selected, then click “OK”, this tool will convert to YUV files automatically and shown on playlist window.

A new playlist for multiple zone is ready, just click “EZ-Play” to send content to NP40 players.
